Dear Sir,

How I wish it were possible to fill your order for my POST MORTEM: SUPPRESSED KENNEDY AUTOPSY (returned herewith).

There is such a book. It is mine. It is published. But it is not printed. That is beyond my immediate capacity.

It is one of three projected books on that autopsy and what relates. Two are written, both in limited editions, and the third is researched. However, the original commercial publisher attitude to the subject persists, and my own efforts have been bankrupting. Without assistance, I cannot forecast when this book will be generally available. When it is, we'll send it.

As of today, I have three books in all published in limited editions and three others partly written. All are new in content and I think significant.

However, the only edition is a Xerox one. Because you are a library, I can make you the offer I have been making serious scholars who want the book. If you can assure its safe return and want to copy it, you may do so if in return I get a copy that I can then make available to those working in the field but without duplicating facilities. This would obtain for both books on the autopsy and the third, which deals with the three best-known assassinations, COUP D'ETAT.

I am curious to know how you learned about this book. I have mentioned it on the west and east coasts, but not in your part of the country.

Sincerely,

Harold Weisberg
